

SERVICE BRIEF

Introducing the New SD-WAN and SASE Services Bundles

Designed to Instantly Extend SD-WAN to SASE, Simplify Operations, and Deliver Higher Value

Executive Summary

Boost your network with the new SD-WAN and SASE Services Bundles. Seamlessly extend Fortinet Secure SD-WAN to FortiSASE in just minutes, delivering consistent security for your hybrid workforce. The bundles also speed up troubleshooting and reduce downtime with advanced SD-WAN underlay and application monitoring that quickly identifies root causes. Get all these powerful services and more for only 35% or 50% of the FortiGate base model price. Fortinet SD-WAN and SASE Services Bundles provide streamlined management and exceptional total cost of ownership (TCO).

Two Bundles Packaged into Four SKUs

Bundle 1 is priced at 50% of FortiGate hardware, consolidating five SKUs and FortiCare Premium:

- **SKU 1329** is designed for FortiGate 6xG+ and includes standard FortiSASE user licenses from 5 to 100.
- **SKU 1337** is designed for FortiGate 6xF and below as well as all E series active FortiGate models. It doesn't include a FortiSASE user license.

Individual SKUs	Description
FC-10-xxxx-288-02-DD	SD-WAN Underlay and Application Monitoring Service includes SD-WAN Application Monitoring Service, FortiGuard SLA Database, Underlay Setup Assistant, and FortiTelemetry SaaS Monitoring
FC-10-xxxx-1230-02-DD	SASE expansion for SD-WAN (SD-WAN SPA connector license plus FortiSASE starter kit for 10, 50, or 100 users)
FC-10-xxxx-662-02-DD	FortiSASE Secure Private Access connector license for SD-WAN
FC-10-xxxx-1125-02-DD	FortiGate Cloud Advanced Subscription, including management, analysis, and one-year log retention plus SD-WAN Overlay-as-a-Service and extended SecOps
FC-10-xxxx-175-02-DD	FortiGuard Attack Surface Security Service (Security, compliance and risk ratings, IoT detection and IoT vulnerability correlation)

Bundle 1 at 50% of FortiGate hardware list price

FC-10-xxxx-1337-02-DD
(For FortiGates 6xF and below along with active E models; doesn't include standard FortiSASE user license)

FC-10-xxxx-1329-02-DD
(For FortiGates 6xG+; includes up to 100 standard FortiSASE user license)

Bundle 2, designed as an add-on to accompany existing security bundles, is priced at 35% of FortiGate hardware consolidating four SKUs:

- **SKU 1387** is designed for FortiGate G models 30–50 and 6xF. It doesn't include a standard FortiSASE user license.
- **SKU 1389** is designed for FortiGate 6xG+ models and includes standard FortiSASE user licenses from 5 to 100.

Individual SKUs	Description
FC-10-xxxx-288-02-DD	SD-WAN Underlay and Application Monitoring Service includes SD-WAN Application Monitoring Service, FortiGuard SLA Database, Underlay Setup Assistant, and FortiTelemetry SaaS Monitoring
FC-10-xxxx-1230-02-DD	SASE expansion for SD-WAN (SD-WAN SPA connector license plus FortiSASE starter kit for 10, 50, or 100 users)
FC-10-xxxx-662-02-DD	FortiSASE Secure Private Access connector license for SD-WAN
FC-10-xxxx-1125-02-DD	FortiGate Cloud Advanced Subscription, including management, analysis, and one-year log retention plus SD-WAN Overlay-as-a-Service and extended SecOps

Bundle 2 at 35% of FortiGate hardware list price

FC-10-xxxx-1387-02-DD
(For FortiGates 6xF and below along with active E models; doesn't include standard FortiSASE user license)

FC-10-xxxx-1389-02-DD
(For FortiGates 6xG+; includes up to 100 standard FortiSASE user license)

Why Bundle?

Thousands of organizations already rely on Fortinet Secure SD-WAN and a broad range of FortiGate solutions. These new bundles provide an easy way to extend the same trusted networking and security capabilities to remote and hybrid employees.

Backed by Fortinet's globally distributed points of presence (POPs), the bundles deliver cloud-based security that enables fast, reliable, and secure access from virtually anywhere. In addition, organizations can build on their existing secure SD-WAN investments to gain enhanced visibility into networks and applications, helping IT teams quickly identify and address potential issues across their environments.

FAQ

Q: Do the new bundles support secure private access for FortiGate VM?

No, they only support the FortiGate appliances. To support a FortiGate VM, organizations will need to purchase a separate SKU: FCX-10-FGVVS-662-02-DD.

Q: What are the services included in the bundle SKUs 1329 and 1337?

The bundles consolidate five SKUs (288, 1230, 662, 175 and 1125) into one, including FortiCare Premium.

Q: What are the services included in the bundle SKUs 1338 and 1339?

The bundles consolidate four SKUs (288, 1230, 662, and 1125) into one.

Q: Will these individual services be available for licensing?

No. The new bundles must be purchased.

Q: Do I need to enable all services in the bundles?

No. You can enable the services just when you need them.

Q: Is the current SASE starter kit SKU 1230 being retired?

Yes.

Q: What's the main difference between bundle SKU 1329, 1337 and bundle SKU 1387 and 1389?

SKUs 1329 and 1337 consolidate five individual SKUs along with FortiCare Premium at 50% of FGT hardware list price while SKUs 1387 and 1389 consolidate four individual SKUs at 35% of FGT hardware list price targeted at existing customers who already purchased security bundles.

Q: Can the SD-WAN Bundle add-on be purchased without another bundle?

The SD-WAN Service Bundle add-on is designed to complement an existing security bundle, such as Unified Threat Protection (UTP) or Enterprise Protection. Because those bundles already include FortiCare support services, the add-on itself does not include support. Support is required for key capabilities such as application-based steering and application performance monitoring to function properly.

Q: Which bundle should I purchase?

Organizations without an existing security bundle should purchase the full SD-WAN Service Bundle, which includes the required support. Customers who already have a supported security bundle (such as UTP or Enterprise Protection) can purchase the SD-WAN Service Bundle add-on to unlock the full capabilities of the SD-WAN feature set.
